HAIRY HANDS / WHY, ROBOT?

Simbiotic Recordings cat SIMBI0006

Available in shops and download

# USER GUIDE!

New NANOBOTS are wee tiny robots in a binary configuration guaranteed to make your music at least 40% more joyful. If used properly NANOBOTS will give you years of listening pleasure.

NANOBOTS generate **high-technology electronic space rock**. This is achieved by absorbing a wide range of Human influences from **DEVO** and **John Barry** to **Led Zep** and **David Bowie** – then reprocessing the data into new sound using **guitars** and **bleeps**.

The binary configuration consists of **JIMBOT** and **SHONABOT** and their core functions are explained below.

**JIMBOT: Vocal and guitar operations.**

**SHONABOT: Vocal and guitar operations.**

All other musical operations are subroutined into the configuration's processing matrix.

**Your new NANOBOTS units have been programmed to appear on Vic Galloway's Radio One show on May 7, appear live to release the single *Hairy Hands* at Stereo, Glasgow, on May 16, then proceed to finish their first album, *Let It Bleep*, for later release.**

By using NANOBOTS you will find more heartsmiles and pleasant world experiences, and you are welcome.

*\*Cleaning your NANOBOTS: Self-cleaning.*

## TRY THIS FUN PROGRAM...

10 CLEAR  
20 LOAD SONGS "NANOBOTS"  
30 PLAY  
40 ENJOY  
50 GOTO 30

Once you're comfortable with your Nanobots, experiment with a more advanced program.

10 CLEAR  
20 LOAD SONGS "NANOBOTS"  
30 RANDOMIZE  
40 PLAY SONG (RND)  
50 ENJOY  
60 VISIT NANOBOTS500.COM  
70 GOTO 30

Here's a program to try if you want to see the single launch:

10 CLEAR  
20 LET D=DATE  
30 IF D="16 MAY" GOTO 40  
ELSE GOTO 20  
40 LET T=TIME  
50 IF T=8PM GOTO STEREO  
ELSE GOTO 40  
60 ENJOY  
70 END

## NANO FACTFILE

1. Nano comes from nine. That means Nanobots are nine times smaller than you think they are.
2. Nanobots are so wee they can ride on the backs of wikipedes (who make Wikipedia).
3. If you built a model of the solar system, where the sun was an orange and the Earth was a pea at the other end of a football pitch, you wouldn't be able to see any Nanobots. But you would still be able to hear them.
